

## Possible Agenda for Dorper Short Course

[1] The Junior Course is for those who are attending a Course for the first time  
It is a basic course and is mainly about learning to identify the different classes of animals and the actual awarding of points for the different characteristics  
The lectures are about the Industry in general and recommendations on the actual farming with the breed.

[2] The Senior Course is for those who have successfully completed a Junior Course  
This is a much more advanced Course and covers the revision of all the various aspects covered on the Junior Course plus doing the placing and judging of animals
